

Shane Fadden

Wirral based Designer

2025 – 2026

Founding Designer at Kiin Bio

Designed and built AI-powered interfaces, working across UI development, design, and product direction.

- Led product design from initial concept through to launch for an AI-guided platform, building execution timelines and experiment workspaces.
- Defined product strategy and UX foundations from the ground up for early-stage platform initiatives.
- Built high-fidelity front-end prototypes using Claude Code, Codex, and Tailwind CSS for rapid validation.

2021 – 2025

Lead Product Designer at Lifebit

Led product design and design systems for complex genomic analytics platforms used by global biomedical researchers.

- Facilitated end-to-end user research to translate customer feedback into core platform improvements.
- Maintained the Figma design system and synchronized UI components with engineering teams via Storybook.
- Designed data-intensive web interfaces and interactive dashboards, collaborating daily with PMs and engineering squads to align design requirements with technical execution.

2018 – 2021

UX Design Manager at Co-op Bank

Directed UX strategy and digital product design across mobile and web banking applications for over two million customers.

- Served as Lead Designer for the Open Banking rollout, designing end-to-end consent and authentication journeys.
- Founded and scaled the bank's design system ("Daly"), embedding WCAG accessibility standards directly into design tokens and component guidelines.
- Line managed and mentored a team of UX/UI designers, introducing career frameworks and raising craft standards.

2015 – 2018

UX Design Manager at Co-op Bank

Designed high-impact mobile ordering and payment experiences for enterprise clients.

- Designed mobile features for the BPMe app, enabling in-vehicle fuel payments for 500,000+ users.
- Led product design for the Hell Pizza mobile app, translating brand identities into native ordering interfaces.
- Conducted usability testing and iterative prototyping across native iOS and Android platforms.

2012 – 2015

Designer & Front-end dev at JTB Studios

I can help with	Digital product design Design systems at scale UX strategy User research & synthesis Design engineering Framer website design & development Experience architecture UX analytics & metrics
Tools	Figma: System architecture and UI components FigJam / Miro: Mapping architecture & user flows Claude Code: AI-agentic coding for rapid prototyping Tailwind: Front-end prototyping & development Storybook: design system documentation PostHog / FullStory: Event based tracking & funnels Linear / Jira: Task management
Current interests	AI tools and apps WebGL motion: Unicorn Studio DIY home projects The National Trust
Education	MA in Professional Design Practice, DIT BSc Multimedia Studies, DCU
